

ASSIGNMENT NO:14.2

Name:Saisharan

Ht.no:2303A51434

bt.no:21

Task Description 1 – (Landing Page Design)

- Create a simple landing page for a product or service. Include a header, hero section, and footer.

Requirements:

- Use HTML and CSS to structure the page.
- Use AI to suggest layout alignment and typography.
- Ensure the page is responsive across devices.

Code screenshot:

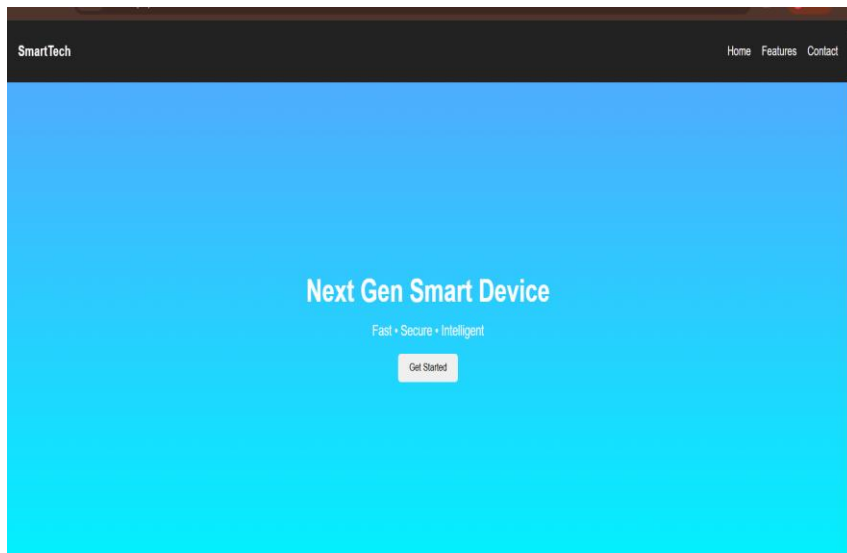

```
<!DOCTYPE html>
<html>
<head>
<meta name="viewport" content="width=device-width,initial-scale=1">
<title>Landing Page</title>
<style>
body{margin:0;font-family:Arial}
header{background: #222;color: #fff;padding:10px 20px;display:flex;justify-content:space-between}
nav a{color: #fff;text-decoration:none;margin-left:15px}
.hero{height:80vh;background:linear-gradient(#4facfe,#00f2fe);display:flex;justify-content:center;align-items:center}
.hero h2{margin:0;font-size:40px}
.hero p{font-size:18px}
button{padding:10px 20px;border:none;border-radius:5px;cursor:pointer}
footer{background: #222;color: #fff;text-align:center;padding:10px}
@media(max-width:768px){header{flex-direction:column}.hero h2{font-size:28px}}
</style>
</head>

<body>

<header>
<h3>SmartTech</h3>
<nav>
<a href="#">Home</a>
<a href="#">Features</a>
<a href="#">Contact</a>
</nav>
</header>

<section class="hero">
<div>
<h2>Next Gen Smart Device</h2>
<p>Fast • Secure • Intelligent</p>
<button>Get Started</button>
</div>
</section>
```

Output screenshot:

Task Description 2 – (Theme Toggle Feature)

- Provide a button to switch between light and dark themes..

Requirements:

- Use JavaScript to toggle CSS classes.
- Use AI assistance to manage color contrast and accessibility.
- Ensure theme preference applies instantly on click.

Code screenshot:

```

instanceTracker.html > Home > < Admin > < Admin
<!DOCTYPE html>
<html>
<head>
<meta name="viewport" content="width=device-width,initial-scale=1">
<title>JS Tasks</title>

<style>
body{font-family:Arial;margin:0;transition:.3s}
.dark{background: #121212;color: #fff}

#banner{background: #ffcc00;padding:10px;text-align:center;display:flex;justify-content:space-between;align-items:center}
button{padding:6px 12px;margin:5px;cursor:pointer}

.gallery{text-align:center;margin:20px}
.gallery img{width:300px;max-width:90%;border-radius:8px}

form{max-width:300px;margin:20px auto;display:flex;flex-direction:column}
input,textarea,select{border:1px solid #ccc;padding:5px}
#msg{text-align:center;font-weight:bold}

@media(max-width:600px){
  .gallery img{width:100%}
}
</style>
</head>

<body>

<!-- Notification Banner -->
<div id="banner">
<span>👋 Welcome to our website!</span>
<button onclick="hideBanner()">X</button>
</div>

<!-- Theme Toggle -->
<button onclick="toggleTheme()">Toggle Theme</button>

<!-- Image Gallery -->
<div class="gallery">
<h3>Image Gallery</h3>
<img id="img">
<br>
<button onclick="prev()">Prev</button>
<button onclick="next()">Next</button>
</div>

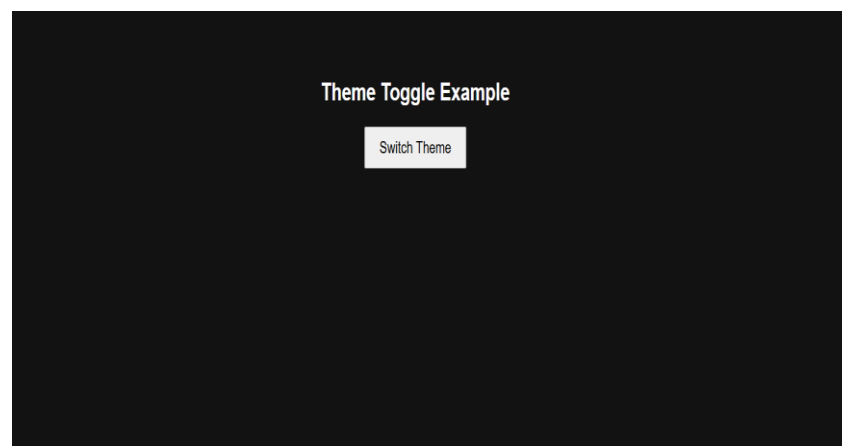

<!-- Feedback Form -->
<form onsubmit="return validate()">
<h3>Feedback</h3>
<input id="user" placeholder="Username" required>
<select id="rate">
<option value="">Rating</option>
<option>★</option>
<option>★★</option>
<option>★★★</option>
<option>★★★★</option>
<option>★★★★★</option>
</select>
<textarea id="comment" placeholder="Comments" required>
<button type="submit">Submit</button>
</form>

<div id="msg"></div>

<script>

```

Task Description 3 – (User Feedback Form)

- Create a feedback form with fields: Username, Rating, Comments.

Requirements:

- Use JavaScript to validate required fields.
- Display success or error messages dynamically.
- Use AI to improve form usability and layout.

Code screenshot:

```
<!DOCTYPE html>
<html>
<head>
<meta name="viewport" content="width=device-width,initial-scale=1">
<title>Feedback Form</title>

<style>
body{
font-family:Arial;
background: #f4f4f4;
display:flex;
justify-content:center;
align-items:center;
height:100vh;
}

form{
background: white;
padding:20px;
width:300px;
border-radius:8px;
box-shadow:0 0 10px rgba(0,0,0,0.1);
}

h3{text-align:center}

input,select,textarea{
width:100%;
padding:8px;
margin:6px 0;
}

button{
width:100%;
padding:10px;
background: #0078FF;
color: white;
border:none;
cursor:pointer;
}

#msg{
text-align:center;
margin-top:10px;
font-weight:bold;
}
</style>
</head>

<body>
```

```

<html>
<head>
<style>
button{
}

#msg{
text-align:center;
margin-top:10px;
font-weight:bold;
}
</style>
</head>

<body>

<form onsubmit="return validateForm()">
<h3>Feedback Form</h3>

<input type="text" id="username" placeholder="Username">

<select id="rating">
<option value="">Select Rating</option>
<option>★</option>
<option>★ ★</option>
<option>★ ★ ★</option>
<option>★ ★ ★ ★</option>
<option>★ ★ ★ ★ ★</option>
</select>

<textarea id="comments" placeholder="Comments"></textarea>

<button type="submit">Submit</button>

<div id="msg"></div>
</form>

<script>

function validateForm(){

let user=document.getElementById("username").value;
let rate=document.getElementById("rating").value;
let com=document.getElementById("comments").value;
let msg=document.getElementById("msg");

if(user==" || rate==" || com==" ){
msg.innerHTML="❌ Please fill all fields";
msg.style.color="red";
return false;
}

msg.innerHTML="✅ Feedback submitted successfully!";
msg.style.color="green";
return false;
}

</script>

</body>
</html>

```

The screenshot shows a 'Feedback Form' with a text input field containing 'cvvv'. Below it is a dropdown menu labeled 'Select Rating'. The dropdown is open, displaying a list of star ratings: 1 star, 2 stars, 3 stars (highlighted in blue), 4 stars, and 5 stars. The background is a light gray.

Task Description - 4 (Image Gallery with JavaScript)

- Task: Display a small image gallery on a web page.

Requirements:

- Use JavaScript to dynamically load images.
- Add next/previous navigation buttons.
- Use AI to optimize layout responsiveness.

```
<!DOCTYPE html>
<html>
<head>
<meta name="viewport" content="width=device-width,initial-scale=1">
<title>Image Gallery</title>
<style>
body{font-family:Arial;text-align:center;margin:20px}
img{width:400px;max-width:90%;border-radius:10px}
button{padding:8px 15px;margin:10px;cursor:pointer}
@media(max-width:600px){img{width:100%}}
</style>
</head>
<body>
<h2>Image Gallery</h2>
<img id="img"><br>
<button onclick="prev()">Previous</button>
<button onclick="next()">Next</button>
<script>
let images=[
  "https://picsum.photos/400/300?1",
  "https://picsum.photos/400/300?2",
  "https://picsum.photos/400/300?3"
];

let i=0;
let img=document.getElementById("img");
img.src=images[i];

function next(){
  i=(i+1)%images.length;
  img.src=images[i];
}

function prev(){
  i=(i-1+images.length)%images.length;
  img.src=images[i];
}
</script>
</body>
</html>
```

Task Description - 5: (Notification Banner)

- Display a notification banner at the top of the page.

Requirements:

- Use JavaScript to show and hide the banner.
- Style the banner using CSS.
- Use AI to ensure smooth transitions and clean UI behavior.

```
<!DOCTYPE html>
<html>
<head>
<meta name="viewport" content="width=device-width,initial-scale=1">
<title>Notification Banner</title>

<style>
body{margin:0;font-family:Arial}

#banner{
background: #ffcc00;
padding:12px;
text-align:center;
position:fixed;
top:0;
width:100%;
transition:0.4s;
}

#banner button{
margin-left:20px;
padding:5px 10px;
cursor:pointer;
}

.hide{
transform:translateY(-100%);
}
</style>
</head>

<body>

<div id="banner">
🔥 Welcome! This is a notification banner.
<button onclick="hideBanner()">Close</button>
</div>

<br><br><br>

<center>
<button onclick="showBanner()">Show Banner</button>
</center>

<script>

function hideBanner(){
document.getElementById("banner").classList.add("hide");
}

function showBanner(){
document.getElementById("banner").classList.remove("hide");
}

</script>

</body>
</html>
```
